PUBLIC SPACE FURNITURE

**Botton + Gardiner is synonymous with quality outdoor commercial furniture. For over 27 years we've been designing and manufacturing sustainable collections that bring public spaces to life, in Australia and around the world.**

Aussies live outdoors, in some of the world's harshest conditions. It means our furniture is designed to stand up to high temperature variances, strong UV radiation and corrosive coastal conditions.

Our ethos is simple. We make outdoor spaces more engaging and functional, so that people want to come together to live, learn, work and play. We're community conscious, design focused, environmentally responsible and relationship driven.

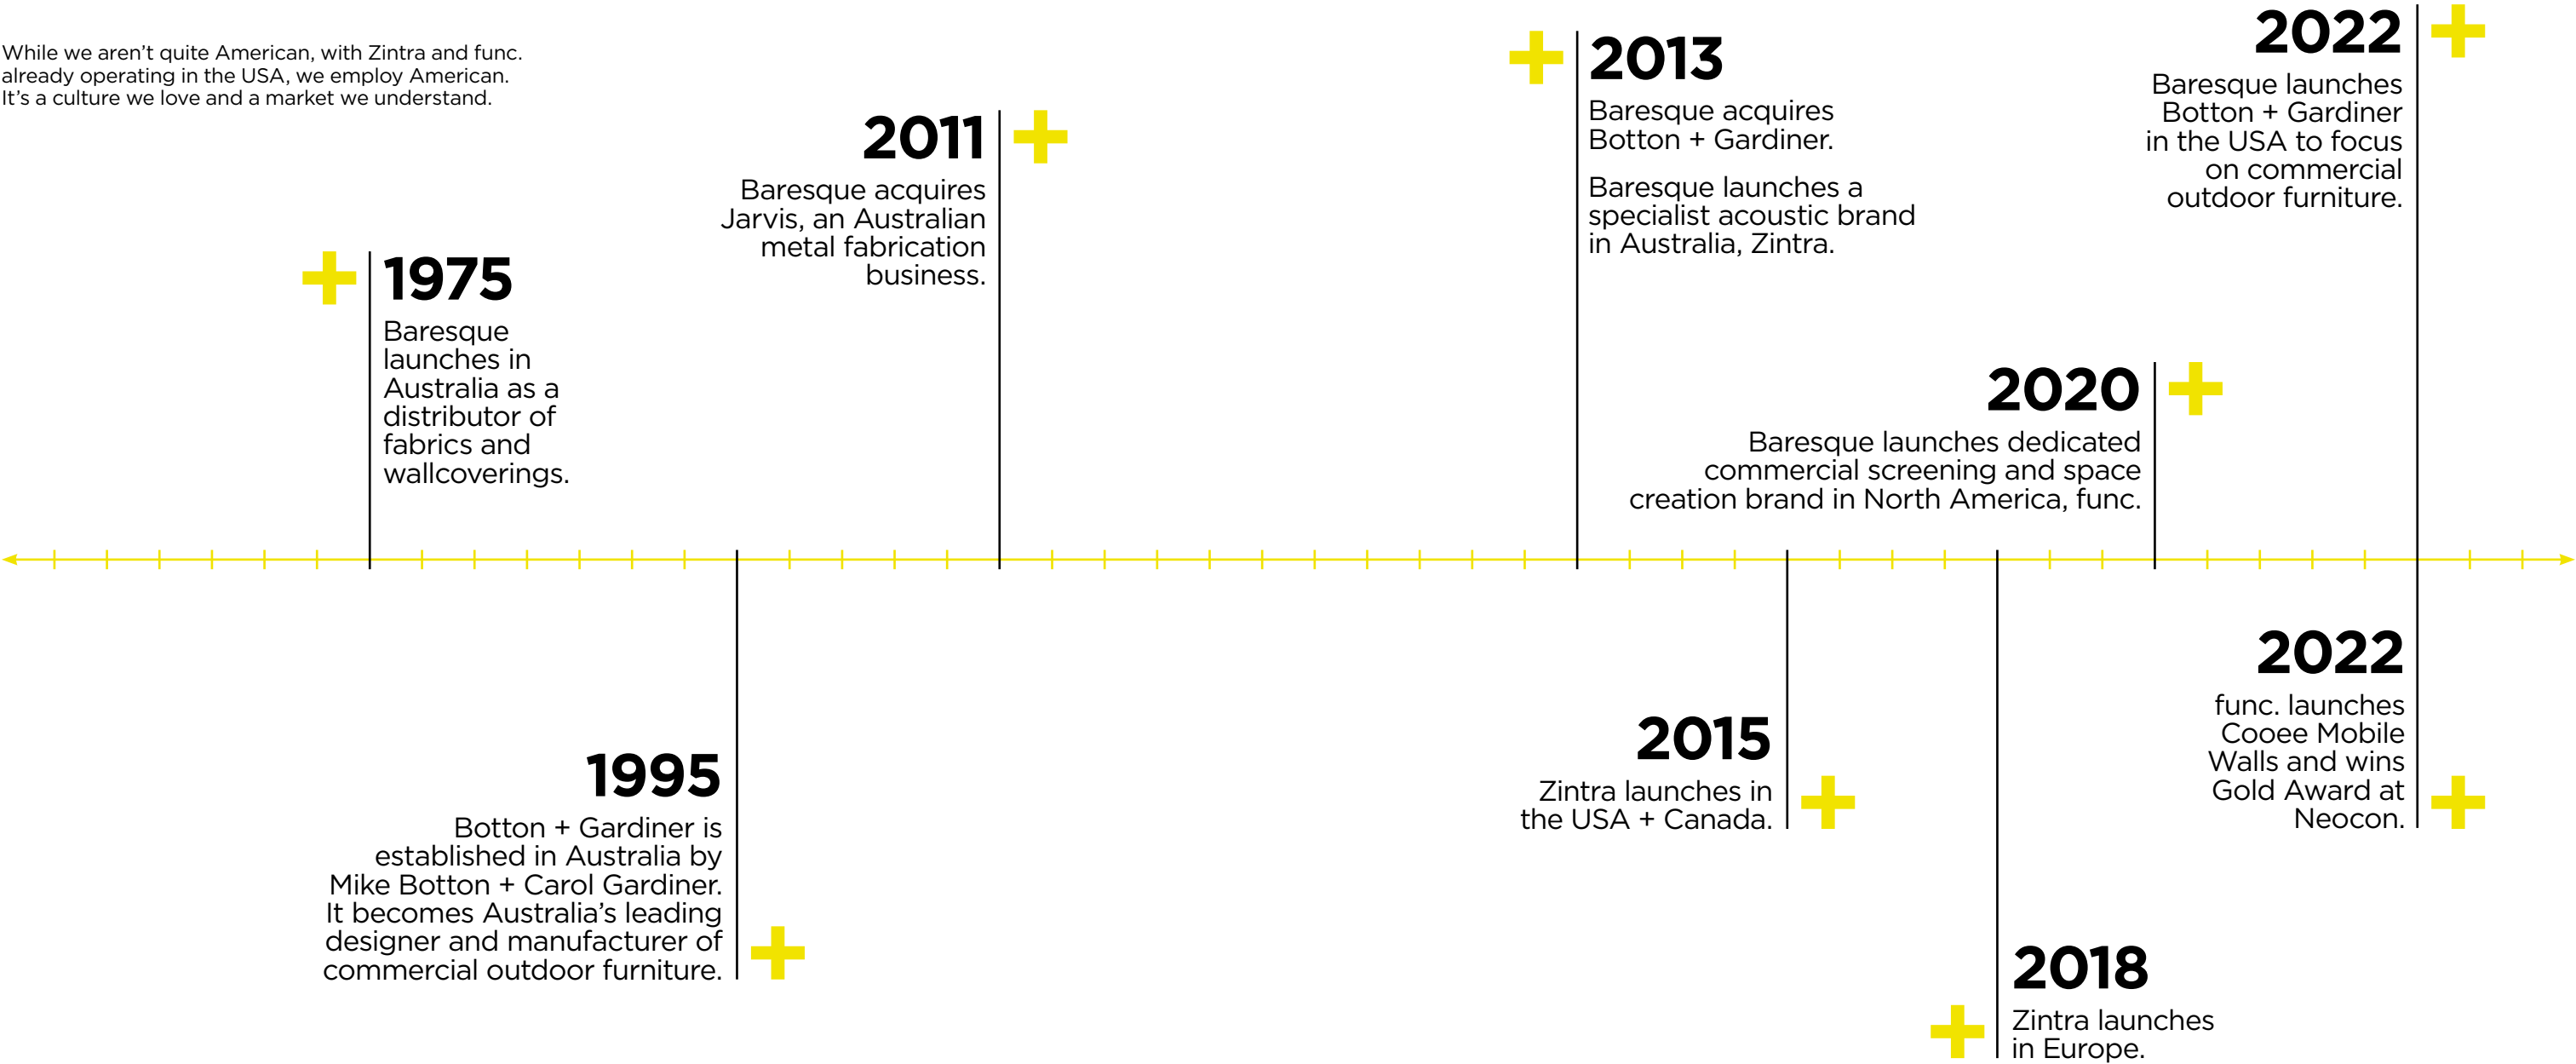

And now, we're made right here in the USA.

**Botton + Gardiner is part of the Baresque Group, an Australian family business that specializes in commercial furniture, acoustics, fabrics and wallcoverings.**

We've expanded from our home in Australia to Europe and North America, and now have our US headquarters in Dallas, Texas.

While we aren't quite American, with Zintra and func. already operating in the USA, we employ American. It's a culture we love and a market we understand.

**Botton + Gardiner believes in the sustainability of our planet. We do everything we can to minimize our environmental impact and create spaces that contribute to the wellness of the people who use them.**

All hardwood is sourced from sustainable forests certified by the Program for the Endorsement of Forest Certification (PEFC), the world's largest forestry certification system.

Our powder-coating process doesn't emit Volatile Organic Compounds (VOCs) and has Environmental Product Declarations (EPDs), so projects qualify for LEED credits.

Galvanized steel, and aluminum is sourced in the USA, so we know it's 100% recyclable and supports local business.

Local manufacturing sorts and responsibly disposes of physical and airborne waste material and reduces carbon-intensive transportation.

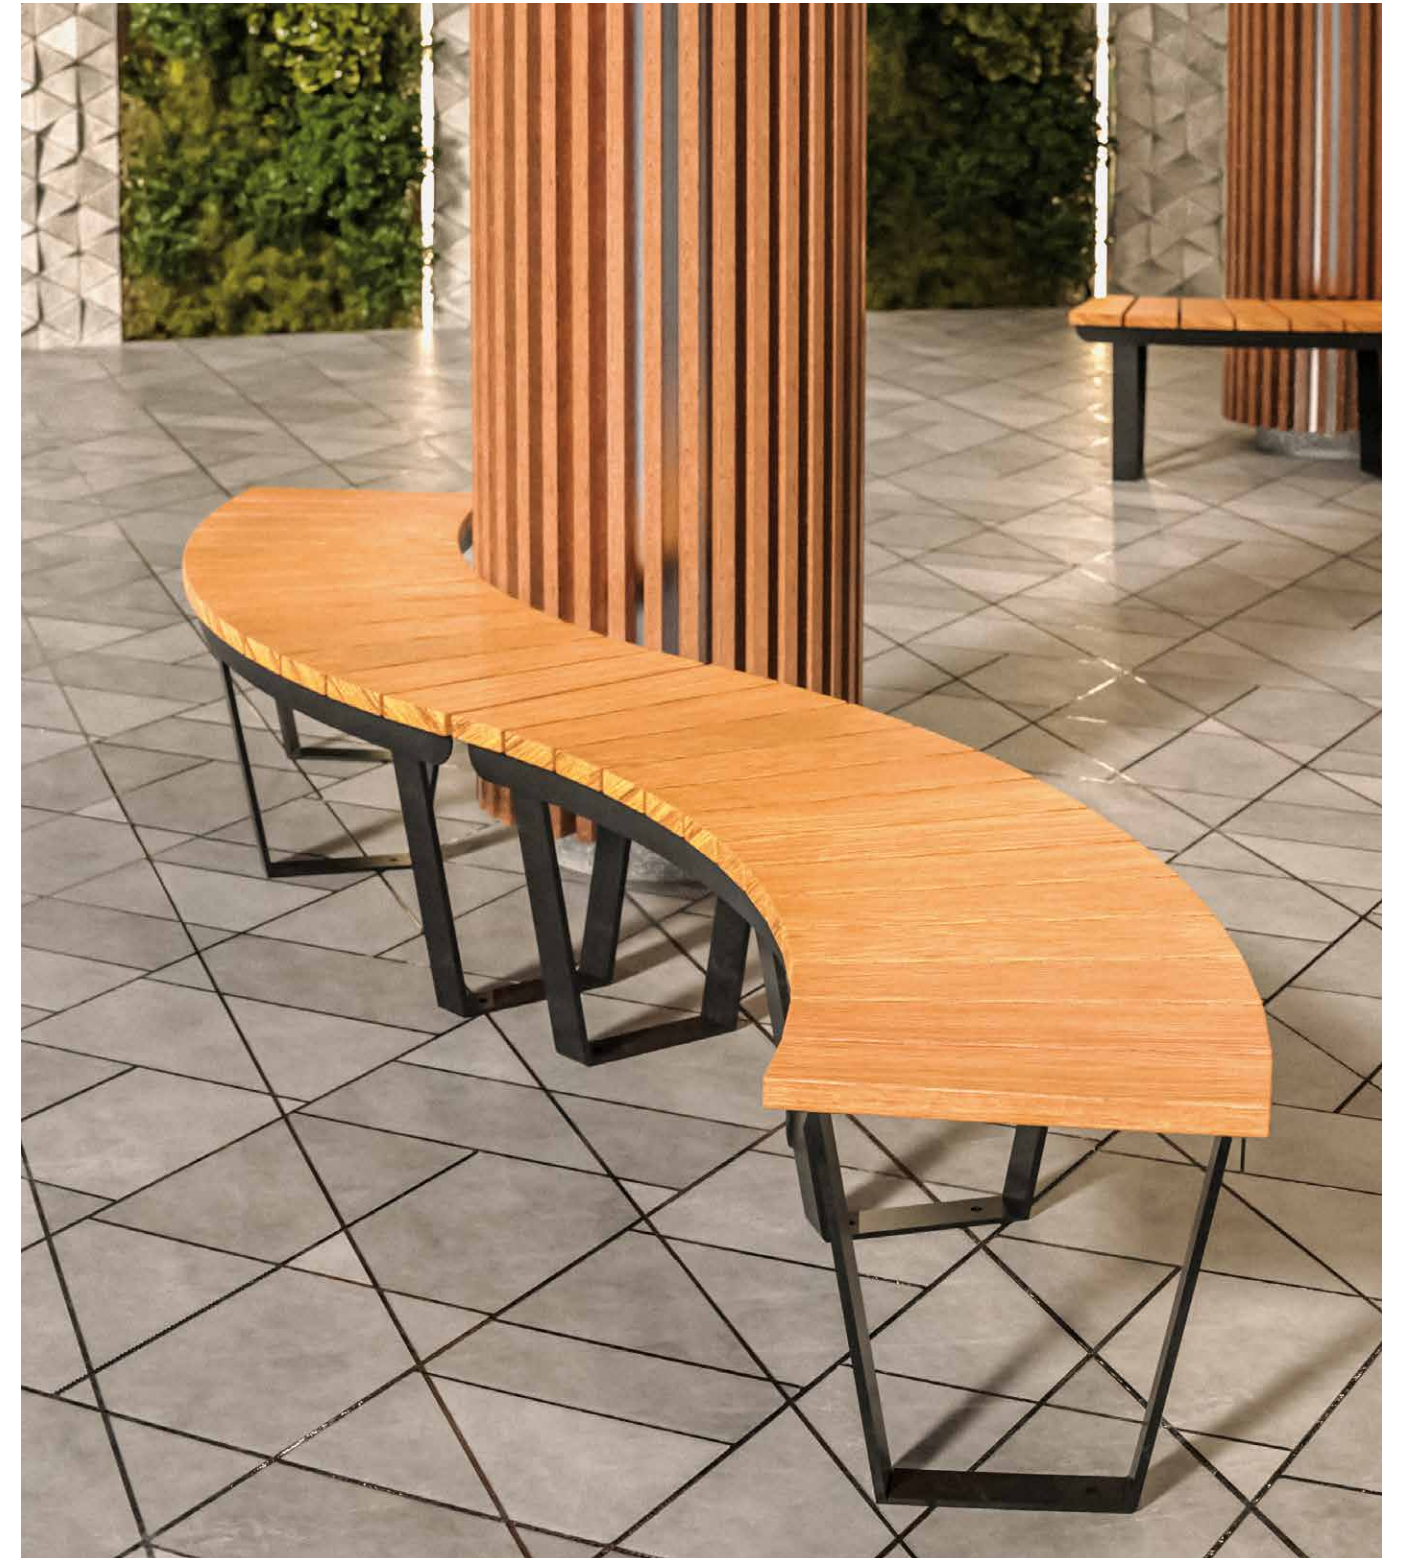

## + terrain

The juxtaposition of solid, hardwood battens and a sleek steel frame is unified with trapezoidal design elements that add strength and visual appeal. Terrain is a high-quality collection that adds a robust, contemporary feel to public spaces.

## + avenue

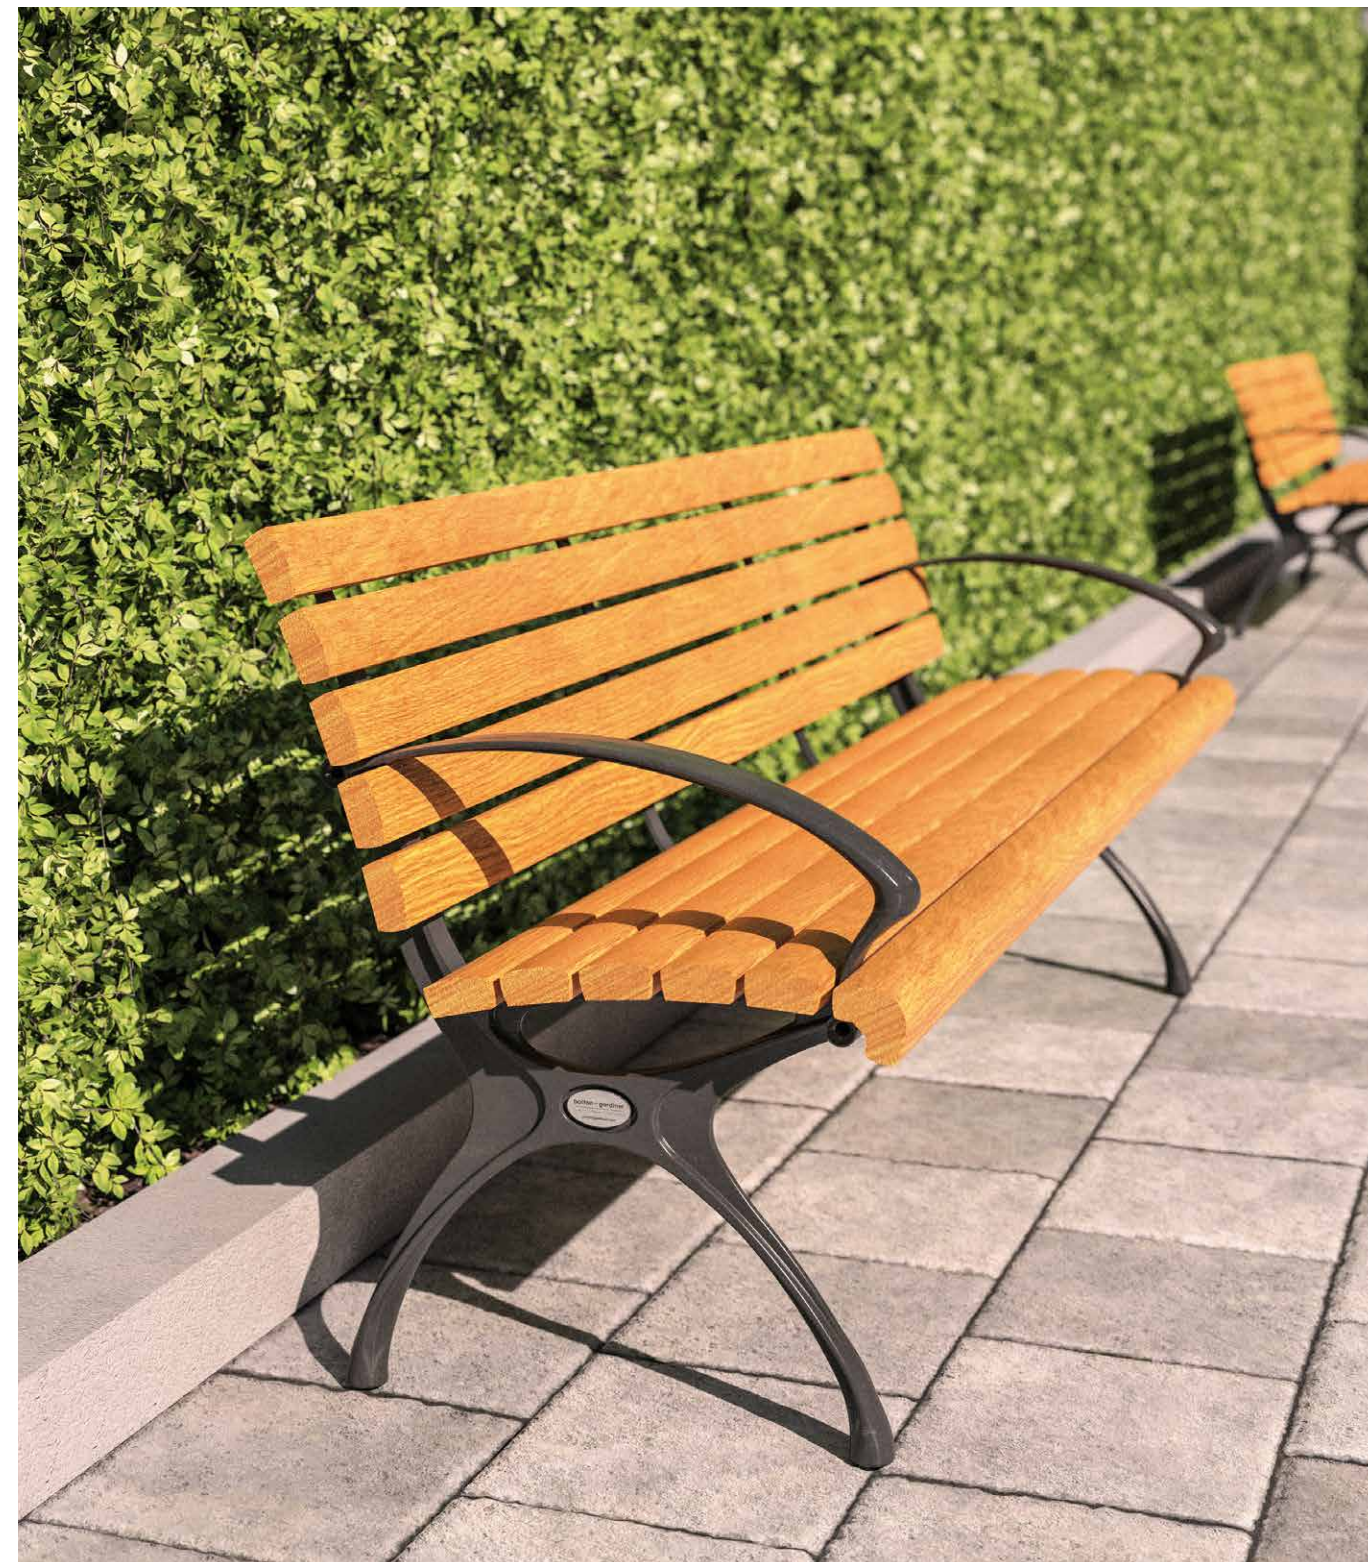

Rectangular battens and a tapered steel frame combine to deliver a simple aesthetic that takes its cues from 20th century industrial design. Avenue's functional feel and light appearance make it a collection that complements and sits within most public spaces.

## + sorrento

Inspired by the Italian love of modern design, Sorrento is as much at home in the public spaces of Chicago as it is on boardwalks of the Mediterranean. The contrasting finishes, folded forms, and modular elements combine to create public spaces that draw the eye and challenge the status quo.

## + urban

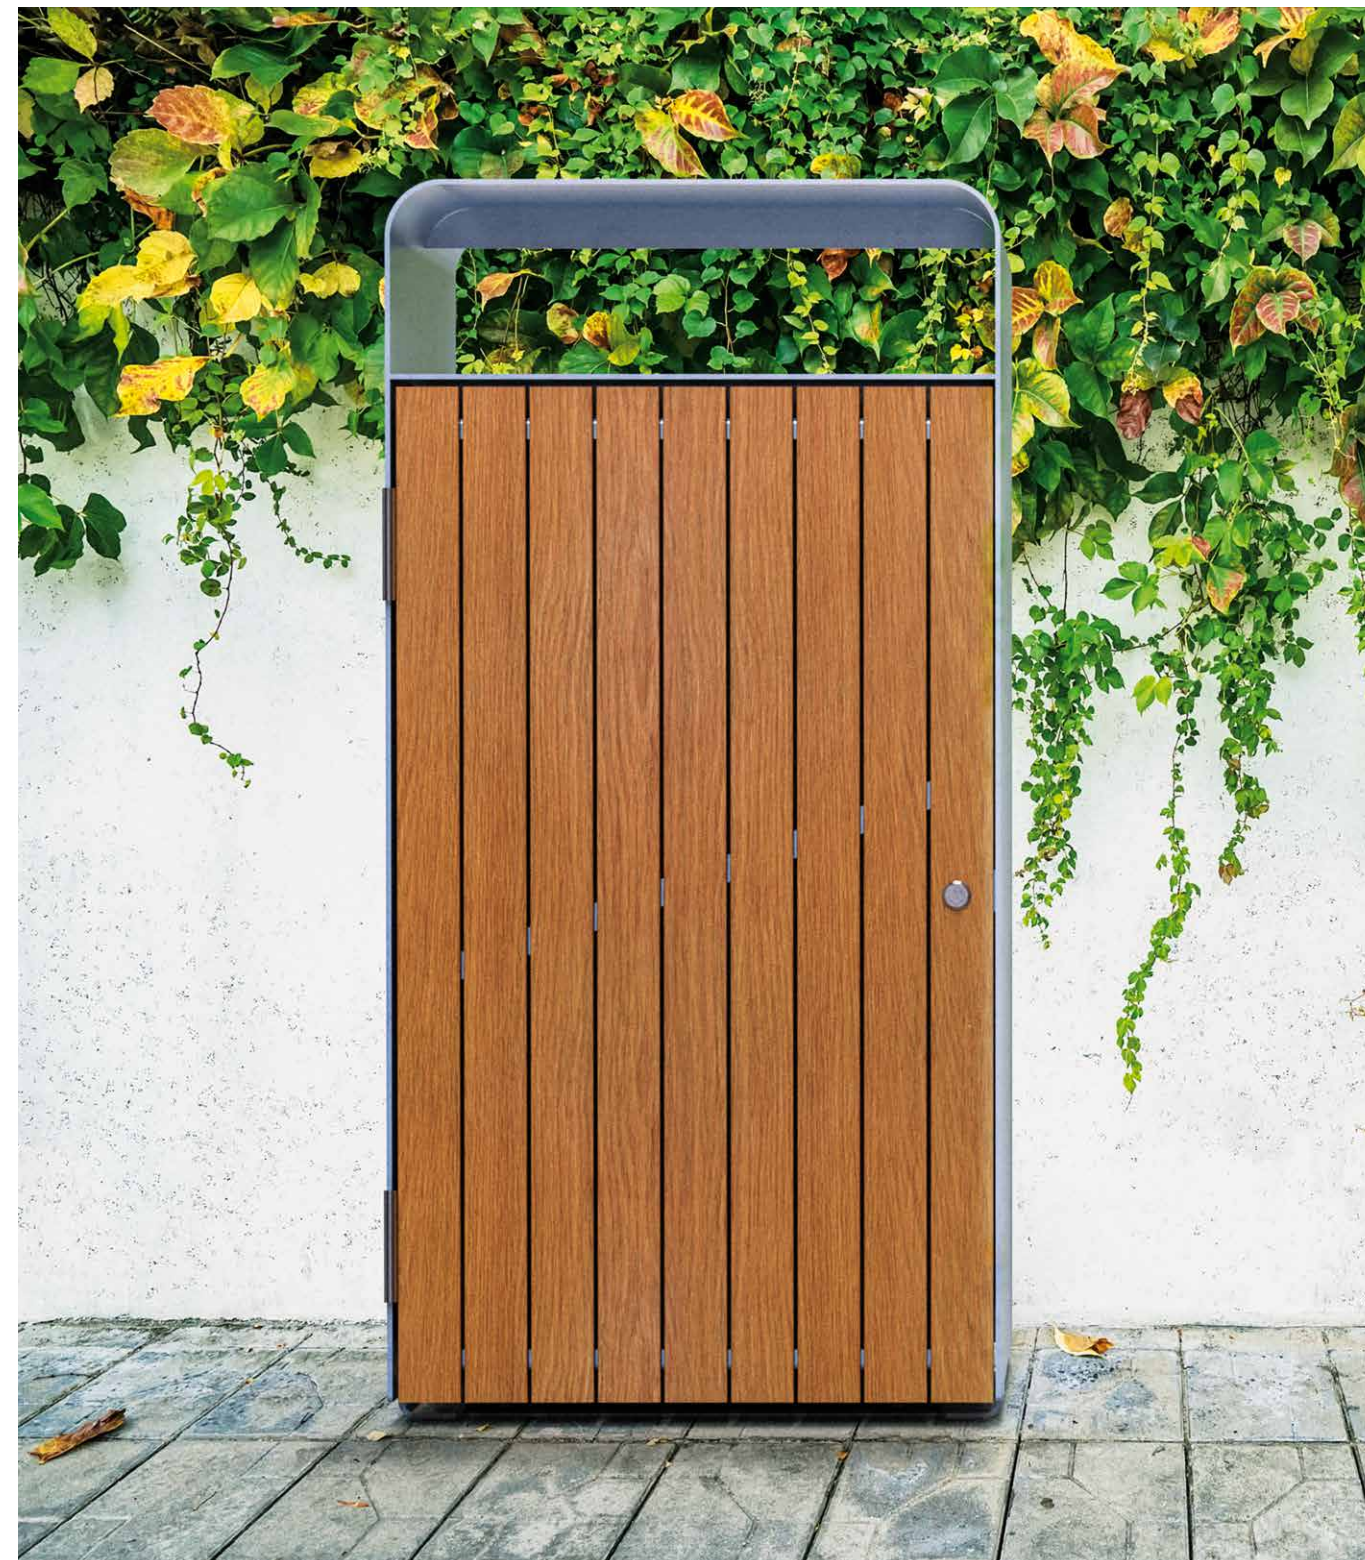

Referencing Paris's famous wrought ironwork, curved cast aluminum framing is complemented by muscular hardwood or duraslat™ surfaces to offer timeless design and modern practicality. Urban is close to our heart; a classic, elegant, and highly functional collection that works in almost any public space.

## + verge

Verge is our simple and highly durable collection. Hardwood or duraslat™ battens work with cylindrical steel posts and circular base plates to add a functional and utilitarian feel to spaces you know are going to get their fair share of wear and tear.

## + bondi

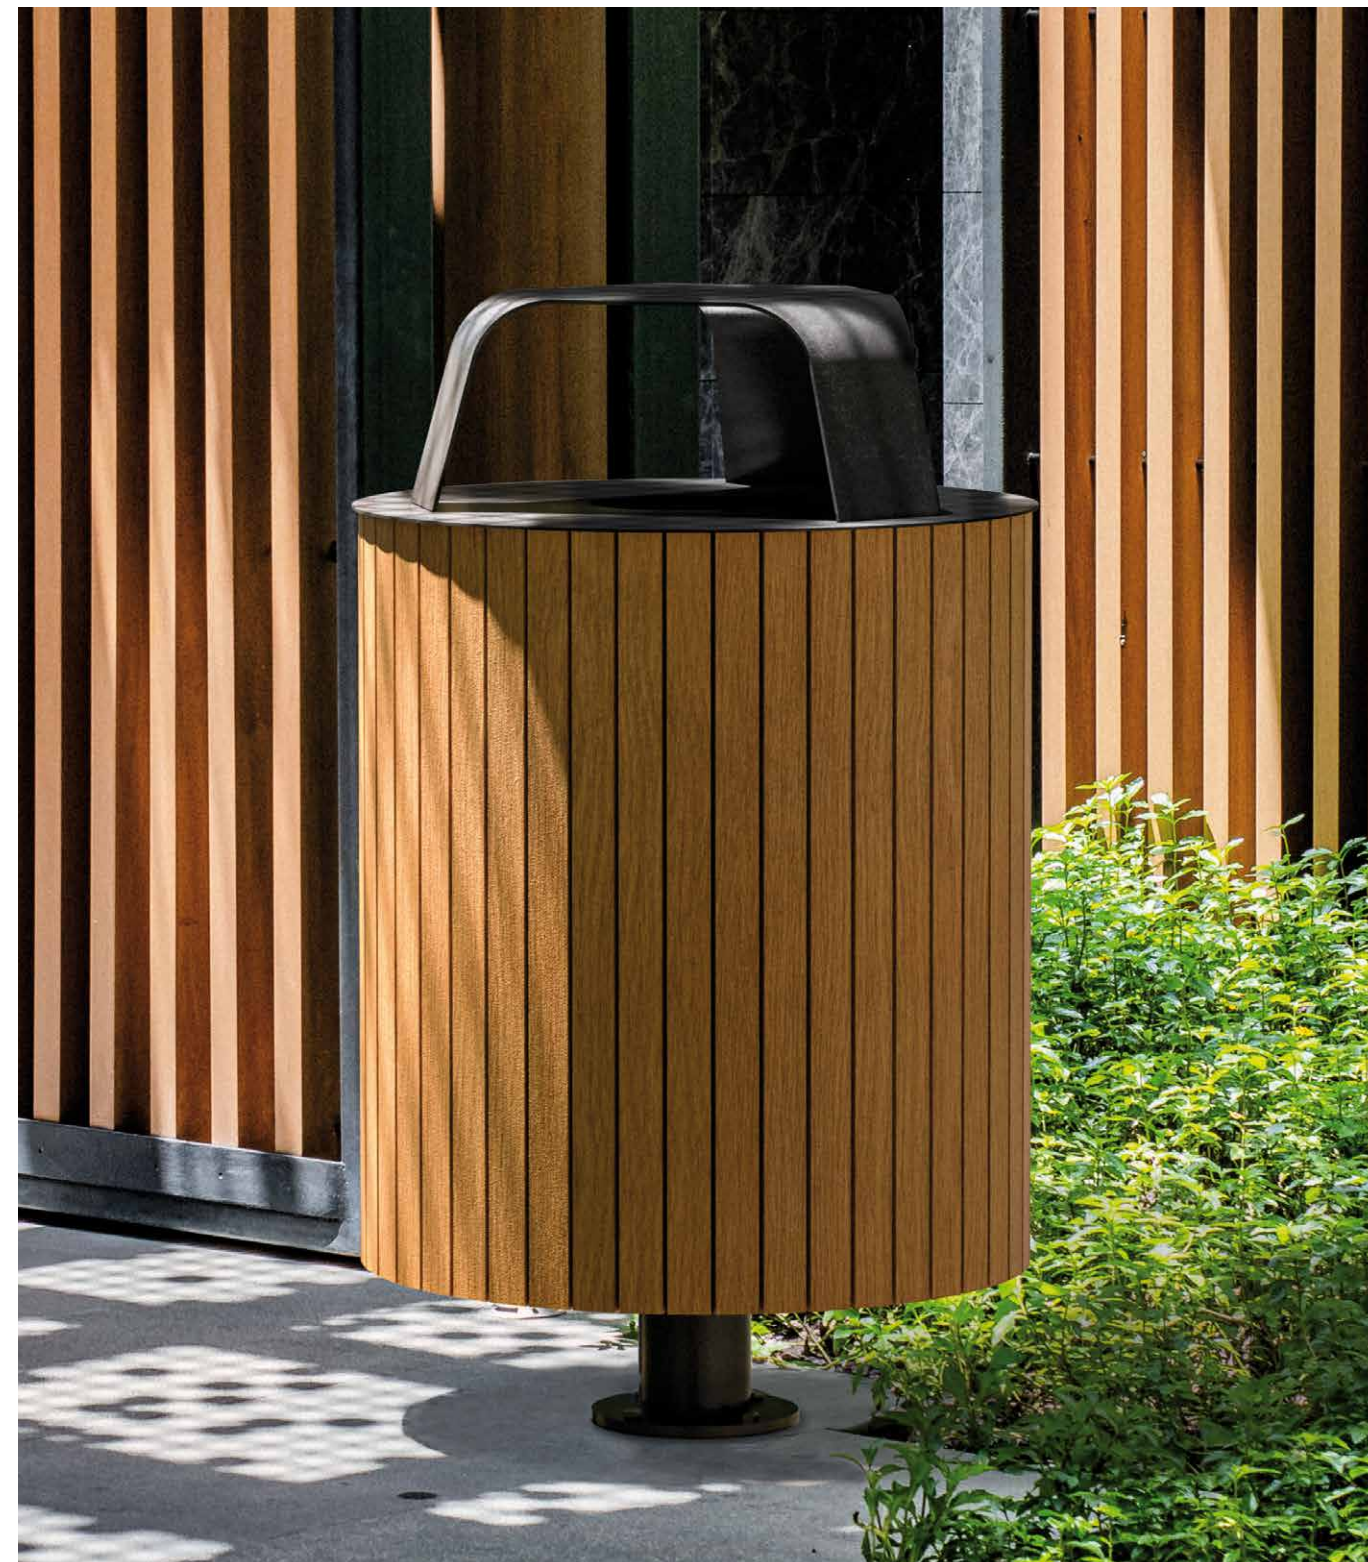

Designed with Australia's most famous beach in mind, Bondi proves that litter bins can add to the aesthetics of a public space. Its compact profile, curved corners, cut-out designs, plus an optional hood make it a sleek and versatile waste management option.

## + brighton

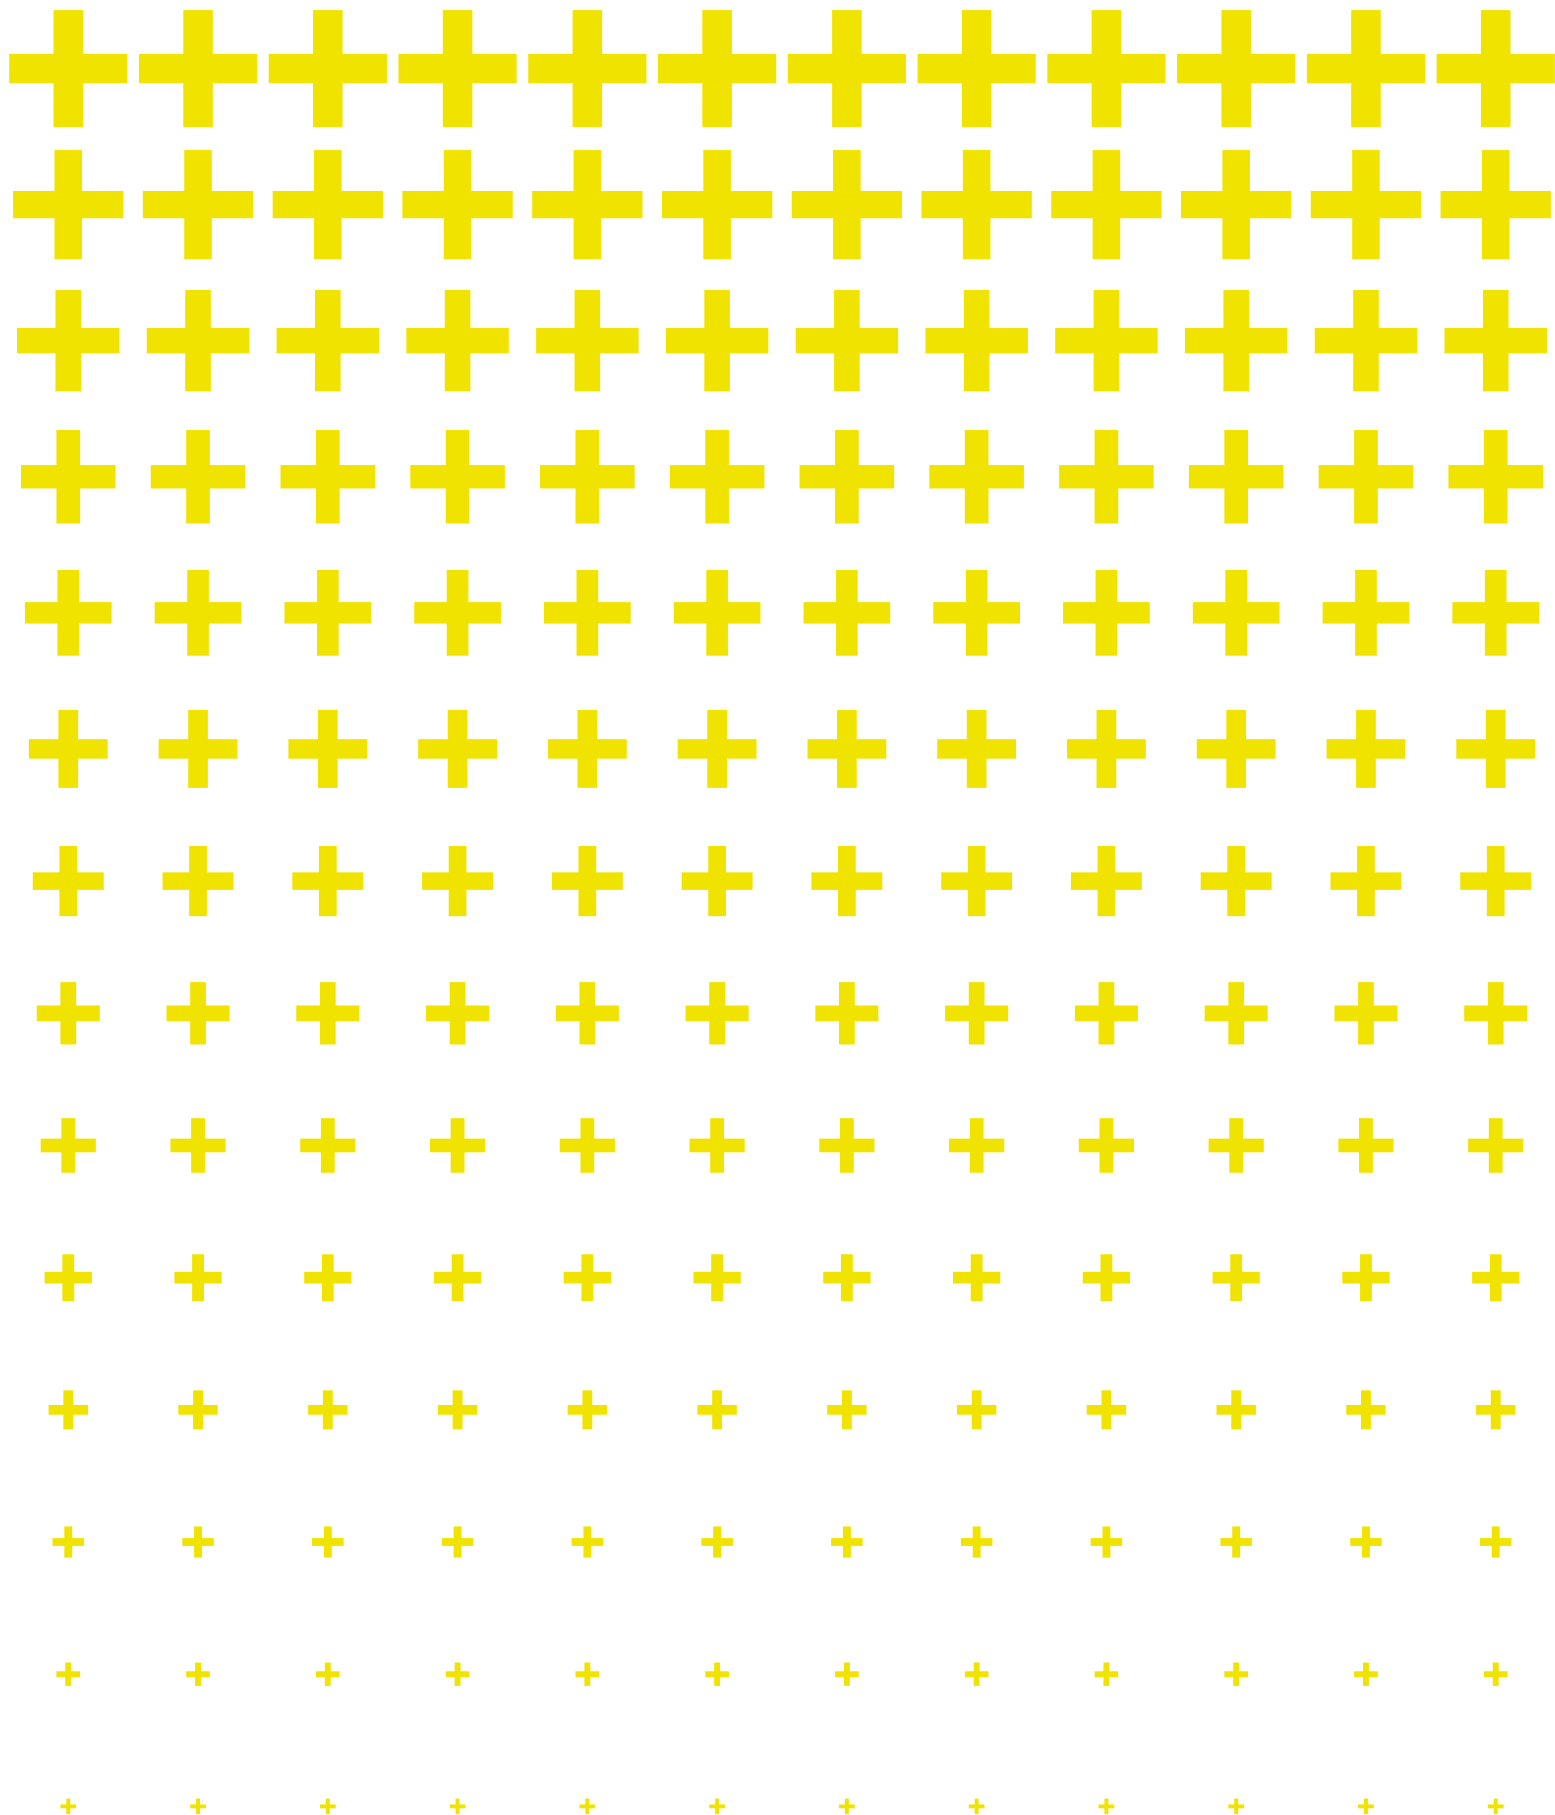

Brighton's detailed design mirrors its functional nature. The exposed steel frame, external hinges and compression lock offer effortless access, while matching panels maximise the 360° visual impact that make it ideal for streetscapes, parks, or campuses.

## + manly

Contemporary cylindrical design creates a minimalist aesthetic that complements the curves of modern public spaces, indoors or out. Manly's wide range of hardwood and powder-coated steel options make it a versatile, eye-catching addition to public spaces that need to stand the test of time.
